

SECURITY INNOVATIONS GROUP

SAFEGUARDING LIVES WITH CUTTING-EDGE SOLUTIONS.

Revolutionizing GPS personnel tracking, communication, drone detection (C-UAS), and drone flight services for first responders, fish & game wardens, and firefighters through innovative solutions and unwavering commitment to personnel security and operational readiness.

Who We Are

Security Innovations Group (SIG) delivers cutting-edge geospatial tracking and security solutions to enhance situational awareness and protect personnel. Founded by defense, intelligence, and technology experts, we bring decades of experience in national security and risk management. Our real-time location intelligence and data-driven strategies help organizations anticipate threats and respond decisively. At SIG, we go beyond reactive security—providing proactive solutions that save lives and ensure mission success.

Rescue Operations

We track personnel with GPS devices shown on **Florian**, our custom software showing real-time locations and emergency alerts on a map. Our devices also help personnel return to base in low visibility situations. Drones equipped with thermal imaging provide real-time aerial surveillance to identify hotspots.

Fish & Game Warden Safety

Using **Florian** and GPS devices, we are able to update the location of fish and game wardens on a map continuously. In an emergency, wardens can trigger an alert that displays on the screen to allow dispatchers an ability to send help quickly.

Personnel Safety & Accountability

Our GPS devices are used to track and locate missing persons in remote or hazardous areas and enhance recovery efforts. We also have the ability to detect and display active drones using live feeds via **Florian**.

Our Mission

We are committed to revolutionizing critical safety and security operations through advanced geospatial tracking, real-time situational awareness, and data-driven insights. Our cutting-edge technologies empower organizations to protect their personnel and assets with precision and confidence. With a foundation built on integrity, expertise, and unwavering responsibility, — ensuring security is not just a measure, but an integrated, proactive strategy for every organization we serve.
