GROUP

SAFEGUARDING LIVES WITH CUTTING-EDGE SOLUTIONS.

Revolutionizing GPS personnel tracking, communication, and drone flight services for first responders, fish & game wardens, and firefighters through innovative solutions and unwavering commitment to personnel security and operational readiness.

Who We Are

Security Innovations Group (SIG) is a woman-owned small business (WOSB) specializing in cutting-edge, emergency preparedness solutions for federal and civilian agencies across the United States. We leverage advanced technologies and industry expertise to create comprehensive GPS tracking systems and drone flight services to ensure personnel security, safety, and accountability.

Our Mission

We are dedicated to redefining the landscape of critical safety initiatives through cutting-edge technologies, strategic insights, and a relentless pursuit of excellence. We strive to deliver unparalleled security services that set new standards for personnel safety. With integrity, expertise, and a deep sense of responsibility, we pledge to create a world where security is not just a measure but a way of life for an organization.

Our Services

Firefighting Operations

We track personnel with GPS devices shown on **Floran**, our custom software showing real-time locations and emergency alerts on a map. Our devices also help personnel return to base in low visibility situations. Drones equipped with thermal imaging provide real-time aerial surveillance to identify hotspots.

Fish & Game Warden Safety

Using **Floran** and GPS devices, we are able to update the location of fish and game wardens on a map continuously. In an emergency, wardens can trigger an alert that displays on the screen to allow dispatchers an ability to send help quickly.

Personnel Safety and Accountability

Our GPS devices and drones are used to track and locate missing persons in remote or hazardous areas and enhance recovery efforts.
