Who We Are & What We Do

Established in 2017, SIG is a privately-held, woman-owned small business headquartered in Northern Virginia. We are a highly-specialized advisory group dedicated to providing management and technical consulting to the federal government and defense contractors. In addition to providing technical guidance in matters such as geospatial tracking & counter-drone (C-UAS) initiatives, SIG provides acquisition and operations support services such as technical writing, pre/post-award consulting, technical evaluation, contract negotiation & management, and OCONUS operations. Our expertise -- coupled with our strategic partnerships and close relationships with industry leaders -- offers our clients uniquely differentiated solutions for complex missions.

PAST PERFORMANCE

Counter-drone (C-UAS) hardware engineering + R&D for federal civilian, DOD, and intelligence agencies.

DIFFERENTIATORS

1. We have decades-long working relationships across the federal civilian marketplace, namely Department of State and USAID. We understand our customers' mission and culture deeply to provide **delivery without distraction**.
2. We are **experts in large-scale contract negotiation, acquisition support, and gathering requirements**. We understand what it takes to make our customers' vision a reality without compromising the mission, especially OCONUS.
3. We have over twenty years of evaluating and developing mobile life-safety technology and software for our customers and we understand how to develop **smart solutions for complex missions**.

CERTIFICATIONS

Woman-Owned Small Business (WOSB) | 8(a) Certification (in-process)
